

NEGATIVE BAT/BIRD SURVEY

This is to certify that Katie Pollard of KP Ecology surveyed
the buildings at
Bishops Farm, Holt Lane, Bishops Caundle, Dorset DT9 5LY

Grid Ref. ST 69071 13431

on 12th July 2022

and found no bats or nesting birds, evidence of bats or nesting birds and no potential roost features for bats. The buildings have negligible bat potential.

NOTE: The survey was conducted in line with Bat Surveys for Professional Ecologists: Good Practice Guidelines 2016 (3rd edition) (Bat Conservation Trust) and Guidelines for Preliminary Ecological Appraisal 2017 (2nd edition) (CIEEM). It shows the situation at the time of the survey. If any during the course of building work, bats, or any other protected species are found, then work must stop by law and the consultant ecologist Dr Katie Pollard (T: 07982 393085) contacted for advice.
